Dedication iii
Preface xiii

Chapter 1: Introduction to AutoCAD Plant 3D

Introduction to AutoCAD Plant 3D 2024 1-2
Starting AutoCAD Plant 3D 1-2
Start Tab 1-2
Working on a Project 1-3
AutoCAD Plant 3D User Interface 1-4
Drawing Area 1-5
Command Window 1-5
PROJECT MANAGER 1-5
DATA MANAGER 1-6
Navigation Bar 1-7
ViewCube 1-7
In-canvas Viewport Controls 1-8
Status Bar 1-8
PROPERTIES Palette 1-9
Different Workspaces in AutoCAD Plant 3D 1-10
Grips 1-11
Invoking Commands in AutoCAD Plant 3D 1-12
Invoking Commands Using Command Prompt 1-12
Invoking Commands Using Ribbon 1-12
TOOL PALETTES 1-14
Application Menu 1-15
Menu Bar 1-16
Shortcut Menu 1-16
AutoCAD Plant 3D Dialog Boxes 1-18
Creating Backup Files 1-19
Converting Auto-saved and Backup Files into AutoCAD Format 1-19
Using the Drawing Recovery Manager to Recover Files 1-20
Closing a Drawing 1-20
Opening a Project Drawing 1-21
Opening a Drawing that is not in the Project 1-21
Opening an Existing Drawing Using the Select File Dialog Box 1-22
Quitting AutoCAD Plant 3D 1-24
AutoCAD Plant 3D Help 1-24
Autodesk App Store 1-25
Additional Help Resources 1-25
Self-Evaluation Test 1-26
Review Questions 1-27

Chapter 2: Creating Projects and P&IDs

Introduction 2-2
PROJECT MANAGER 2-2
Creating a New Project in AutoCAD Plant 3D 2-2
    Creating a New Drawing 2-6
    Grouping Project Files 2-6
Designing a P&ID 2-7
    Adding Equipment to a P&ID 2-8
    Adding Pipe Lines 2-9
    Assigning Tags to a Line 2-10
    Assigning Custom Service Category to a Line 2-11
    Creating and Adding Custom Pipe Line Segments to TOOL PALETTES 2-13
    Adding Custom Tags to Pipe Line Segments 2-14
    Adding Valves 2-17
    Adding Instruments and Instrumentation Lines 2-18
    Adding Fittings 2-20
    Adding the Off Page Connectors 2-20
    Connecting the Off Page Connectors 2-20
Validating the Drawing 2-21
    Checking for Errors 2-22
Editing the Drawing 2-24
    Moving an Equipment 2-25
    Moving a Valve 2-25
    Moving a Line 2-25
    Editing a Line 2-26
    Grouping Lines 2-27
    Editing a P&ID Symbol 2-28
    Substituting Components 2-28
    Converting AutoCAD Components into P&ID Symbols 2-28
    Adding Intelligence to the Custom P&ID Symbols 2-29
Tutorial 1 2-35
Self-Evaluation Test 2-52
Review Questions 2-52
Exercise 1 2-53

Chapter 3: Creating Structures

Introduction 3-2
Creating a Grid 3-2
    Editing Grids 3-3
Setting the Representation of the Structural Member 3-3
Adding Members 3-4
Creating Stairs 3-6
    Editing Stairs 3-7
Creating Railings 3-7
Creating Ladders 3-9

Evaluation Copy. Do not reproduce. For information visit www.cadcim.com

Ladder Tab 3-10
Cage Tab 3-10
Creating a Plate/Grate 3-11
Creating Footings 3-12
Editing the Structural Members 3-12
Changing the Length of a Member 3-12
Restoring the Member to its Original Length 3-13
Cutting Member at Intersections 3-13
Creating Miter Joints 3-14
Trimming/Extending a Member 3-14
Exploding a Structure 3-15
Visibility Options 3-15
Hiding and Displaying Components 3-16
Exchanging Data with other Applications 3-16
Tutorial 1 3-16
Tutorial 2 3-21
Self-Evaluation Test 3-29
Review Questions 3-30
Exercise 1 3-30

Chapter 4: Creating Equipment

Introduction 4-2
Creating Equipment 4-2
Placing Equipment in a Drawing 4-3
Adding a Vessel 4-3
Adding a Heat Exchanger 4-4
Adding a Pump 4-4
Adding a Heater 4-5
Creating a Customized Equipment 4-6
Modifying Equipment 4-7
Converting Solid Models into Equipment 4-8
Converting Inventor Models into Equipment 4-9
Attaching Objects to an Equipment 4-9
Detaching Objects from an Equipment 4-10
Adding Nozzles to a Customized Equipment 4-10
Adding Nozzles to a Converted Equipment 4-13
Modifying Nozzles 4-13
Tutorial 1 4-14
Tutorial 2 4-25
Self-Evaluation Test 4-30
Review Questions 4-30

Chapter 5: Editing Specifications and Catalogs

Introduction 5-2
Getting Started with AutoCAD Plant 3D Spec Editor 5-2
Working with Spec Files 5-2

Evaluation Copy. Do not reproduce. For information visit www.cadcim.com

Creating a New Spec File from an Existing Spec 5-3
Adding Parts to the Spec Sheet 5-5
Editing the Parts Added to a Spec 5-5
Setting the Part Use Priority 5-7
Adding Notes to a Group 5-8
Editing the Long Description Styles 5-9
Assigning a Long Description Style to Multiple Specs 5-11
Assigning Operators (Actuators) to Valves 5-11
Working with the Catalog Editor 5-13
Creating a New Catalog from an Existing Catalog 5-15
Adding a New Part to a Catalog 5-15
Creating a New Component Using Parametric Graphics 5-16
Creating a New Component Using Block Based Graphics 5-17
Modifying the Branch Table 5-19
Creating Branch Table Legends 5-19
Assigning Legends to a Branch Table 5-20
Tutorial 1 5-21
Tutorial 2 5-26
Tutorial 3 5-31
Self-Evaluation Test 5-39
Review Questions 5-39

Chapter 6: Routing Pipes

Introduction 6-2
Selecting a Spec 6-2
Working with the Spec Viewer 6-2
Routing a Pipe 6-3
Routing a Pipe with a New Line Number 6-4
Setting the Route Line 6-5
Routing a Pipe from a Line 6-6
Routing a Pipe using a P&ID 6-6
Routing a Pipe from an Equipment 6-7
Working with the Compass 6-7
Connecting two Open Ports of Pipes 6-9
Changing the Pipe Size while Routing 6-11
Changing the Orientation Plane while Routing a Pipe 6-11
Creating a Cutback Elbow 6-12
Creating a Roll Elbow 6-13
Creating Bends 6-14
Changing the Elevation while Routing a Pipe 6-14
Routing Pipe at an Offset 6-15
Routing a Pipe at a Slope 6-16
Creating Branches 6-18
Creating a Tee Branch 6-18
Creating an O-let Branch 6-19
Creating a Stub-In Branch 6-20
Creating a Stub-In Branch at an Offset from the Center of the Header Pipe 6-20

Evaluation Copy. Do not reproduce. For information visit www.cadcim.com

Creating a Branch from an Elbow 6-21
Creating a Stub-In Branch at a Precise Location 6-21
Adding a Reinforced Pad to a Stub-In Branch 6-22
Creating a Weld Connection 6-22
Creating Autodesk Connection Point 6-23
Editing an Autodesk Connection Point 6-23
Routing a Pipe from an Autodesk Connection Point 6-24
Tutorial 1 6-24
Self-Evaluation Test 6-41
Review Questions 6-42

Chapter 7: Adding Valves, Fittings, and Pipe Supports

Introduction 7-2
Adding Valves and Fittings 7-2
Adding Valves and Fittings to a Pipe using the Spec Sheet 7-2
Adding Valves and Fittings Using a P&ID 7-3
Placing Valves and Fittings while Routing a Pipe 7-4
Placing Custom Parts 7-5
Mapping a P&ID Object to a Plant 3D Object 7-6
Adding Pipe Supports 7-8
Adding a Dummy Leg 7-10
Adding a Hanger and Connecting it to a Structural Member 7-10
Modifying the Pipe Supports 7-11
Copying and Moving a Pipe Support 7-13
Connecting Two Pipe Supports 7-14
Converting Solids into Pipe Supports 7-14
Attaching Objects to a Pipe Support 7-14
Detaching Objects from a Support 7-15
Insulating a Pipe 7-15
Modifying the Pipe Components Using Grips 7-15
Substituting a Pipe Component 7-15
Rotating a Pipe Component 7-15
Flipping a Pipe Component 7-15
Flipping a Component Inline with the Pipe 7-16
Changing the Elevation of the Pipe 7-16
Changing the Valve Operator 7-16
Validating a 3D Model 7-18
Tutorial 1 7-19
Self-Evaluation Test 7-27
Review Questions 7-28

Chapter 8: Creating Isometric Drawings

Introduction 8-2
Isometric Drawing Types 8-2
Creating a Quick Isometric Drawing 8-2
Creating a Production Isometric Drawing 8-5

Evaluation Copy. Do not reproduce. For information visit www.cadcim.com

Viewing Isometric Results 8-5
Placing Iso Messages and Annotations 8-6
Exporting a Pipe Component File 8-8
Creating an Iso from a Pipe Component File 8-8
Locking a Line Number 8-9
Configuring Isometric Drawing Settings 8-9
Configuring Iso Style Settings 8-9
Configuring Annotation Settings 8-10
Configuring Dimensional Settings 8-11
Configuring Themes 8-12
Configuring Sloped and Offset Piping Settings 8-13
Setting the Title Block and Display Properties 8-14
Tutorial 1 8-16
Tutorial 2 8-21
Tutorial 3 8-25
Self-Evaluation Test 8-32
Review Questions 8-33

Chapter 9: Creating Orthographic Drawings

Introduction 9-2
Creating Orthographic Drawings 9-2
Generating the First View 9-2
Creating the Adjacent View 9-6
Adding Annotations to the Drawing 9-7
Adding Dimensions to the Drawing 9-8
Locating a Component in the 3D Model 9-8
Editing a Drawing View 9-8
Updating a View 9-8
Adding Gaps to Pipes 9-8
Generating Bill of Material New 9-8
Displaying Pipes as Single Lines New 9-9
Creating BOM Annotation 9-9
Tutorial 1 9-10
Self-Evaluation Test 9-17
Review Questions 9-17

Chapter 10: Managing Data and Creating Reports

Introduction 10-2
DATA MANAGER 10-2
Viewing data in the DATA MANAGER 10-3
Modifying the Display of Data 10-3
Displaying the Data by Object Type and Area 10-3
Zooming to Plant Objects 10-4
Locating an Object in the Drawing Area 10-4
Scrolling through the Data in the DATA MANAGER 10-5
Editing Data in the DATA MANAGER 10-5

Evaluation Copy. Do not reproduce. For information visit www.cadcim.com

Placing Annotations in a P&ID Using the DATA MANAGER 10-5
Filtering the Information in the Data Table 10-6
Viewing only the Selected Record in the Data Table 10-6
Viewing all the records in the Data Table except the Selected One 10-6
Viewing the Data of the Objects Selected in the Drawing Area 10-6
Exporting Data from the DATA MANAGER 10-7
Importing Data to the DATA MANAGER 10-7
Accepting or Rejecting Changes in the Imported Data 10-8
Viewing Reports in the DATA MANAGER 10-8
Exporting the Project Reports 10-9
Importing the Project Reports 10-9
Working with the Report Creator 10-10
Generating Reports using the AutoCAD Plant Report Creator 10-11
Tutorial 1 10-14
Tutorial 2 10-18
Self-Evaluation Test 10-20
Review Questions 10-20

Project: Thermal Power Plant

Index I-1

Evaluation Copy. Do not reproduce. For information visit www.cadcim.com
